The background of the slide is a textured, light-colored surface with a pattern of small, irregular shapes. Three circular navigation buttons are arranged in a triangular pattern. Each button has a raised, circular border and a central arrow pointing in a different direction: the top button points up, the bottom-left button points down-left, and the bottom-right button points down-right. The text "New Navigation Options" is centered over the buttons in a bold, dark red font.

Your Librarian

How Library Search Boxes Behave

My topic for today is going to be: **How do cost containment efforts affect nursing practice?**

If I plug that into Google...it will look for all of those words and spit me thousands of websites of varying helpfulness. With library search boxes, if I do the same thing....nothing or very few results!

No results match your search for **"How do cost containment efforts affect nursing practice?"**.
Having trouble? Help us improve our search and [let us know](#) what you're trying to find.
Or, [save this search](#) for future reference.

This is because library searches do not understand natural language and look for all of the words I put in the search box.

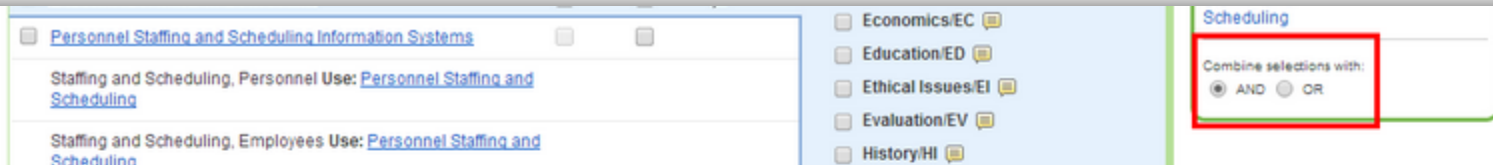

Identify & Brainstorm Keywords

To search most effectively in the library, start by identifying keywords associated with your topic.

- Start by identifying the **key concepts** already present: cost containment, nursing practice.
- Then identify **synonymous terms**: cost savings, cost control, cost reduction, nursing, nurses
- Also think about **broader and more specific terms**: economics, budgets, emergency room nurses, staffing

Keywords are also important because authors writing about things might not necessarily use the same words you would to describe something. This process can be helpful in thinking about how you might narrow down a topic that is too big to research or broaden one that is too narrow.

Previous/Next Buttons

To combine heading searches with **both OR and AND**, you will need to run each headings search separately and then use the combine search function in **Search History** (more later in the guide).

Search Database

When you are done exploring the headings and ready to try the search, hit the big green **Search Database** button.

Choosing a Template

When choosing your Template...

- for **Subject and Course guides**, please use **KL Tab Navigation**.
- for **How Do I...** guides and tutorials, please use **KL Side Navigation** (choose between One or Two Content Columns)

Follow the same guidelines in the Kreitzberg Library for Online Students group, but use the templates with **Online** at the start of the name.
